**DETAILED ACTION**

***Claim Objections***

Claim 7 is objected to because of the following informalities: "said circuit" should correctly be --said load driver circuit--. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by "high side driver circuit". The specification disclosed such phrase, but its function and meaning are not descriptive/clear. How this "high side driver circuit" is implemented/used in the reference circuit.

***Allowable Subject Matter***

Claims 1-6, 12-16 are allowed.

Claims 7-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 1-16 call for, among others, a voltage regulator (150) having the connections and functions thereof.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Lukens (4,551,687); Gilbert (5,043,675); Chen et al. (5,861,775)) show further analogous prior art circuitry.
